

Process Gas: CO₂ 25.00 L/min

Flow, Pressure & Vapor Instrumentation

BROOKS[®]
INSTRUMENT

Beyond Measure

Mass Flow & Pressure Controllers

SLA Series Elastomer Sealed Pressure Controllers

Eliminate droop, boost and hysteresis through closed loop control utilizing the core technology in our thermal MFCs.

GF100 Series Metal Sealed Thermal MFCs

Ultra-fast response time and high-purity all-metal flow path minimizes contamination, enhances yield.

GP200 Series Metal Sealed P-MFCs

Our most advanced MFC, GP200 is the first fully pressure insensitive P-MFC with a unique design approach enabling the ultimate precision process gas delivery over the widest range of operating conditions.

Quantim® Coriolis MFCs

Most accurate measurement and control for very low flow rates of liquid or gas.

Key Features

Mass Flow & Pressure Controllers

SLA Series
General Purpose
Thermal MFCs

Proven MFC for widest range of mass flow needs and applications delivers superior results and lower total cost of ownership.

GF40 Series
MultiFlo™ Thermal MFCs

Multiple gases and flows in one device maximizes process flexibility and productivity while preserving accuracy, all in a compact footprint.

5850E Series
Analog Thermal MFCs

Extremely reliable, accurate and repeatable measurement and control for demanding industrial processes.

SLAMf Series
NEMA 4X/IP66
Thermal MFCs

Delivers the precise accuracy and long-term stability of our proven SLA5800 but with a specially engineered NEMA 4X/IP66 hardened enclosure for the harshest environments.

Variable Area Flow Meters

Sho-Rate™ Series
Glass Tube VA Flow Meters

Simple, rugged design for long-lasting performance with low and high-flow gas and liquid applications where viewing the process is important.

GT1600 Series
Glass Tube VA Flow Meters

Simple, rugged design for long-lasting performance with low and high-flow gas and liquid applications where viewing the process is important.

MT3750 Series
Metal Tube VA Flow Meters

Reliable, durable, low flow measurement for long-lasting performance in harsh environments.

MT3809 Series
Metal Tube VA Flow Meters

Widest temperature, pressure and flow ranges for measuring fluids in hazardous, remote areas.

Key Features

- Rugged, single piece frame construction
- Easy-change design allows quick interchangeability of tube assemblies
- Rotating lens provides 180° view with magnification ideal for panel mounting
- Optional needle valves and flow controllers mounted to inlet or outlet for precision flow control
- Standard direct read scales on tube for all fluids and fluid conditions
- Standard millimeter scales with flow curves for all fluids and fluid conditions

- Configurable to retro-fit GT1000, GT1300 and Full-View Series
- Premium materials of construction ensure safety, indoor and outdoor durability
- Process connections can be rotated 360°, 180° viewing window, panel mounting option
- Transparent scale for easy readability; also acts as a shield for absolute safety
- Monitor critical flow conditions with alarm option (purchase at time of order or add it in the field)
- Optional integral inlet or outlet valve saves space, time & cost, eliminating potential leak points

- For use in low flow applications with high-pressure or hazardous fluids
- Compact design
- 4–20 mA output
- Good upgrade from glass tube flow meters
- Optional alarms, transmitters and limit switch controllers provide added levels of measurement and control

- Repeatable flow measurement even at low process temperatures down to -198°C (-325°F) and high process temperatures up to 420°C (788°F)
- Designed for high process pressures 1379 bar / 20,000 psig
- 4–20 mA output with HART
- Integrated FOUNDATION Fieldbus
- Optional local operator interface with LCD screen
- Alarm functions meet SIL 2 requirements
- Multiple corrosion-resistant wetted materials and indicator housings available

Performance

- Fluid Types — clean liquids and gases
- Flow Range —
 - Air: Up to 15 scfm / 425 slpm
 - Water: Up to 5 gpm / 19 lpm
- Accuracy — ± 3 , ± 5 , $\pm 10\%$ FS
- Max Pressure — 200 psig (13.8 bar)
- Temperature Range — 1–121°C (33–250°F)

- Fluid Types — clean liquids and gases
- Flow Range —
 - Air: Up to 150 scfm/270 m3n/hr
 - Water: Up to 21 gpm/4,800 l/h
- Accuracy — ± 2 , ± 5 , $\pm 10\%$ FS Class 2.5 acc VDI/VDE (Optional $\pm 1\%$ FS, Class 1.6 acc VDI/VDE)
- Max Pressure — 500 psig (34.5 bar)
- Temperature Range — 1–121°C (33–250°F)

- Fluid Types — clean liquids, gases and steam
- Flow Range —
 - Air: Up to 110 scfh / 3.1 m3n/hr
 - Water: Up to 26 gpm / 100 l/h
- Accuracy — ± 3 , $\pm 5\%$ FS
 - Class 2.5, 4.0 VDI
- Max Pressure —
 - Standard 1500 psig (100 bar)
 - Optional 4000 psig (276 bar)
- Temperature Range — -50–204°C (-58–400°F)

- Fluid Types — clean liquids, gases and steam
- Flow Range —
 - Air: Up to 750 scfm / 1200 m3n/hr
 - Water: Up to 440 gpm/100,000 l/h
- Accuracy — ± 1 , $\pm 2\%$, $\pm 3\%$, $\pm 5\%$ FS
 - Class 1.6, 2.5, 4.0 VDI
- Max Pressure —
 - Standard 6000 psig (413.7 bar)
 - Optional 20,000 psig (1379 bar)
- Temperature Range — -198–420°C (-325–788°F)

Pressure Products

XacTorr Series Capacitance Manometers

Advanced vacuum measurement technology virtually eliminates drift and provides longer operational life.

VersaTorr Series Vacuum Gauges

All-in-one ultra-wide range gas measurement solution for many vacuum applications.

Pressure Gauges, Switches & Transmitters

Smart, precise digital measurement through dependable pressure monitoring in ultra-high purity and specialty gas applications.

SolidSense II® Pressure Transducers

Exceptional versatility and reliability combined with durable designs and materials to handle a wide range of industrial processes.

Key Features

- Shielded sensor resists particle accumulation
- Dual-zone temperature control improves measurement stability and repeatability
- Multi-decade digital calibration provides superior window of known accuracy
- Independent diagnostic service port
- Heated or unheated models available

- Ultra-wide measuring range of 9 decades
- Programmable settings and parameters
- Heat-loss MEMS Pirani to measure most accurately in the low and medium vacuum ranges
- Tri-Sensor Transducer model uses precision capacitance diaphragm gauge sensor to eliminate gas dependencies

- Weld-free, corrosion-resistant materials
- Outstanding zero stability and accuracy within 0.25% FS
- Models available with integrated display or full-function programmable display
- Digital thermal compensation uses multi-point temperature-compensation method
- Proprietary micro-machined silicon strain gauges exhibit very low zero drift

- 2-inch stainless steel solid-state switch and transmitter
- Adjustable pressure switch set point to operate lights or relays
- Multiple process connections and socket orientations
- 316L steel withstands harsh environments
- Welded in oxygen-free chambers to meet rigid cleanliness and safety guidelines of demanding high-purity applications

Performance

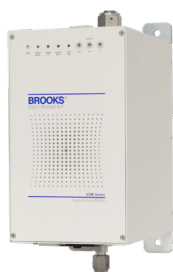

- Pressure Range — 0.1 to 1000 Torr
- Accuracy — $\pm 0.15\%$ to 0.25% of reading
- Temperature Range — Ambient to 160°C
- Measurement Range — 4 Decades

- Pressure Ranges — 7.5×10^{-7} to 1000 Torr
- Accuracy — $\pm 5\%$ to $\pm 0.5\%$ of reading
- Temperature Range — Ambient to 50°C
- Measurement Range — 9 Decades

- Pressure Range — -15 – 3000 psi (205 bar)
- Accuracy — 1% FS
- Output Type — Analog voltage or current
- Certifications/Approvals — CE, FM and ATEX

- Pressure Range — Up to 4000 psi (276 bar)
- Accuracy — 1% FS
- Switches available with logic outputs:
 - Off-on and Type 1 (0 to 9–30 Vdc)
 - Type 2 (8 to 30 Vdc)
 - Type 3 (0 to 5 Vdc)
- Transmitters available with industry standard outputs — 4–20 mA; 0–5 Vdc; 1–5 Vdc

Vapor Delivery, Secondary Electronics & Software

Vapor Delivery Modules

Self-contained sub-system for the delivery of ultra-high purity water vapor.

0250 Series Power Supply, Readout & Set Point Controller

Compact, innovative, reliable microcomputer-based controller provides power for up to four Brooks Instrument thermal mass flow, Quantim Coriolis mass flow and/or pressure devices.

0260 Power Supply, Smart Interface & Controller

Microsoft® Windows® based software application that provides expanded control and monitoring capabilities in laboratory and research environments. Together with the power supply and RS485 to USB hardware module this product provides a great turnkey solution for monitoring and controlling up to 30 RS485 S-Protocol mass flow and/or pressure control devices.

BEST Software

The Brooks Expert Support Tool (BEST) provides expanded control, diagnostics and servicing capabilities for GF40, GF1XX, GP200, PC1xx, Quantim®, VDM300 and all versions of SLA mass flow and pressure products.

Key Features

- | | | | |
|--|--|--|---|
| <ul style="list-style-type: none"> • Direct water vapor measurement with superior flow accuracy • Connects directly to the house deionized water supply • Operates at lower temperatures (non-superheated state) • Independent diagnostic service port | <ul style="list-style-type: none"> • Self-diagnostics on every power-up • Batch control for single- or multi-channel recipes • Blending supports master slave configuration and operation • Gas factor scaling adapts to any non-calibrated fluid • Valve Override Control — open, closed or normal • Large, graphic eight-line backlit display • Smart DDE Software simplifies data exchange with programs such as Excel, Test Point™ and LabVIEW™ | <ul style="list-style-type: none"> • Control up to 30 RS485 S-Protocol mass flow and/or pressure control devices • Batch control for single- or multi-channel batch recipes • Save and reuse flow process and blending recipes for any network device • Select gas page, change flow units and configure alarms • Valve Override Control — open, closed or normal • Diagnostic monitoring for alarms, valve drive and device temperature • Data logging to track process results or troubleshooting | <ul style="list-style-type: none"> • Easy plug-and-play installation via computer's serial or USB port • MultiFlo™ configuration capability is accessible, providing users with a fast and simple method to reprogram the gas and range on MultiFlo™ enabled GF100, GF80, GF40 and Celerity/Unit brand mass flow controllers without removing them from the gas line or compromising on accuracy. • User-friendly interface running under Microsoft® Windows® simplifies operation and data capture. • Able to switch control of the mass flow device between BEST and the external process controller for real-time on-line diagnostics and tuning. • Able to capture device log data to text file. |

KEY ADVANTAGES:

EtherNet/IP EtherCAT PROFIBUS

Exceptional performance, flexible topologies, full duplex, self-terminating, easy to deploy, uses standard, cost-effective Ethernet cabling

PROFIBUS DeviceNet Fieldbus Foundation

Widely used and field proven industry standards communication protocols, well suited for medium and large automation projects, cost-effective versus point-to-point solutions

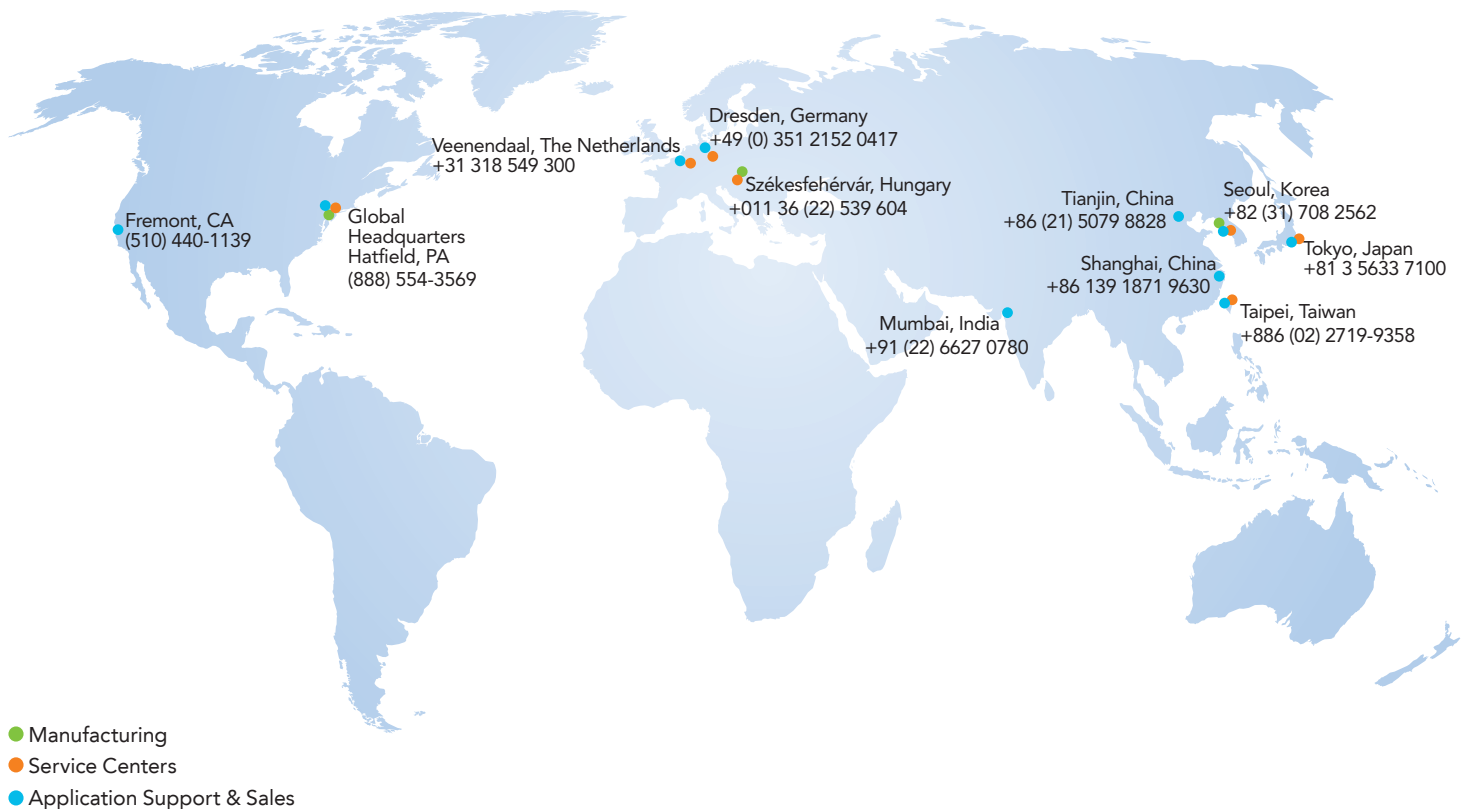

HART COMMUNICATION PROTOCOL

Widely accepted, ideal for set-up, diagnostics and troubleshooting, easy implementation over 4-20 mA signal lines, easy to use with HART hand held communicator, can be used effectively over long distances and in electrically noisy environments

RS-485

Good for small automation projects or systems, supports typical topologies used in small systems, custom tools and software (DDE, DLL, 0260 Smart Interface), simplifies installation

Service and Support

Global Service and Support

Brooks Instrument products are recognized as the most stable and reliable in the world. To keep your products operating at the highest level of accuracy and extend their life, your best choice is to trust Brooks Instrument Factory Certified Service repair and recalibration offerings.

Only Brooks Instrument Factory Certified Service ensures that your Brooks Instrument flow, pressure, vapor and vacuum products are serviced utilizing the same metrology standards, work instructions, equipment and custom software as our manufacturing processes — by expert technicians trained exclusively on servicing Brooks products.

Our global service center network offers fast turnaround on repair and recalibration requests.

All specifications are subject to change without notice.
