

Beyond Measure

GF120xHT Series

Ultra-High Purity, High-Temperature Digital Mass Flow Controllers & Meters

GF120xHT high-temperature mass flow controllers and meters are designed to control and measure the mass flow rate of vapor from liquid or solid precursors to support the growing usage of these precursors in semiconductor processes.

The flow module is designed to withstand operating environments of up to 150°C. To support this temperature range, the electronics are remotely connected to the rest of the device in a lower temperature location (max 50°C). The remote electronics can be DIN mounted with a choice of three different interconnecting cable lengths - 3ft, 8ft, and 16.5ft standard. To support all user needs, the GF120xHT flow module has been designed with a low profile. For ease of integration, the low profile allows this product to be installed in new process applications or as an upgrade for older generation Brooks 9861 Series applications.

| Features | Benefits |
|--|---|
| High-temperature Applications | Ability to support applications up to 150°C for liquid precursor vapor delivery. |
| Service Port and User-Friendly Interface Provide Access to Advanced Diagnostics | Convenient interface to diagnostics for maximum uptime. Ensures device is operating within user specified limits for high yield and maximum uptime. |
| Corrosion Resistant Hastelloy Sensor | Provides unmatched long-term sensor stability ensuring maximum yield and throughput. |
| Calibrated at Customer Process Conditions | Calibrated at customer operating temperature and pressure to ensure optimal operation. |

Product Specifications

Performance^{1,2}

| renonnance ' | | |
|---|---|--|
| Full Scale Flow Range ³ | 50 sccm to 5 slm | |
| Flow Accuracy | ±1% S.P. >35-100%, ±0.35% F.S. 2-35% | |
| Repeatability & Reproducibility | $5-100\% = \pm 0.15\%$ of S.P., $2-5\% = \pm 0.015\%$ of F.S. | |
| Linearity | ±0.5% F.S. (included in accuracy) | |
| Response Time (Setting Time) Normally Closed Valve | < 1 sec | |
| Control Range | 2-100% (Normally Closed Valve) | |
| Valve Shut Down (N.C. Valve) | <1% of F.S. | |
| Zero Stability | < ± 0.5% F.S. per year | |
| Temperature Coefficient ⁴ | Span: 0.05% F.S. per °C, Zero: 0.005% F.S. per °C | |

|--------------------------|---|
| Environmental Compliance | RoHS Directive (2011/65/EU & 2015/863/EU) REACH Directive EC 1907/2006 |

¹Based on factory N₂ calibration, reference conditions are as per SEMI E12 specification, standard pressure and temperature, consult applications for accuracy and response for analog communications. ²Devices are sized per application specific conditions provided by the customer. Operating temperature and pressure provided by the customer are used in device calibration. Devices will be calibrated between 150T and 1500T inlet pressures.

³Consult factory for additional flow options.

⁴The temperature coefficient specification is applicable ±10°C from the calibration temperature listed on the product label and CoC.

⁵Operating temperature range is defined for the flow module, the remote electronics must be mounted at a low temperature location (50°C max). ⁶Applicable for those units with displays.

Service and Support

Brooks is committed to assuring all of our customers receive the ideal mass flow controllers for their application, along with outstanding service and support to back it up. We operate first class repair facilities located around the world to provide rapid response and support. Each location utilizes primary standard calibration equipment to ensure accuracy and reliability for repairs and recalibration and is certified by our local Weights and Measures Authorities and traceable to the relevant International Standards.

Visit www.BrooksInstrument.com to locate the service location nearest to you.

START-UP SERVICE AND IN-SITU CALIBRATION

Brooks Instrument can provide start-up service prior to operation when required. For some process applications, where ISO-9001 Quality Certification is important, it is mandatory to verify and/or (re)calibrate the products periodically. In many cases this service can be provided under in-situ conditions, and the results will be traceable to the relevant international quality standards.

SEMINARS AND TRAINING

Brooks Instrument can provide customer seminars and dedicated training to engineers, end users, and maintenance persons. Please contact your nearest sales representative for more details. Due to Brooks Instrument's commitment to continuous improvement of our products, all specifications are subject to change without notice.
